

**SAND DOLLAR ISLAND AND TIGERTAIL LAGOON
SUPPLEMENTAL SURVEY SCOPE OF SERVICES
CEC FILE NO. 26.320
March 5, 2026**

The scope of services presented herein is designed for Coastal Engineering Consultants, Inc. to assist the City of Marco Island and the Hideaway Beach District Board perform a one-day survey in support of the Sand Dollar Island / Tigertail Lagoon Restoration program.

SCOPE OF SERVICES

TASK 1 SAND DOLLAR ISLAND/TIGERTAIL SURVEY

Perform a one-day topographic and bathymetric survey in support of the Tigertail Lagoon / Sand Dollar Island Restoration program. The survey will include up to fifteen beach profiles. The survey lines will extend offshore approximately 3,000 feet from MHW or to the -10 ft NAVD88 contour, whichever is less.

All monitoring activities as described herein shall be conducted in accordance with the current version of the “Monitoring Standards for Beach Erosion Control Projects” as established by the DEP Bureau of Beaches and Coastal Systems (BBCS). Survey data will reference horizontal datum, Florida West Zone 1983, and vertical datum, NAVD88. The azimuths and line lengths shall coincide with historical profile surveys.

Prepare and submit deliverables in electronic format (e.g., pdf file) including Field Notes, Data File (XYZ), and Surveyor’s Report.

PROFESSIONAL FEES

Payment for services shall be made on a fixed fee basis equal to \$9,806.
