City of Marco Island

April 25, 2025

To Whom it May Concern,

As a party to a Beach Vendor Permit Application for beach equipment and vehicles, the City of Marco Island would like to remind you of the following.

The City of Marco Island requires all beach vendors to provide within your application package, authorization, and identification of the location of kiosks/chickee/tiki huts, storage lockers or containers, or any other structures used for your operations. This identified area constitutes a permitted operational area.

In accordance with Ch. 54 Sec. 54-36. (j),

"[Soliciting, canvassing, advertising, prohibited.] Soliciting, canvassing, advertising, and/or engaging in commercial operations other than permitted beach operations is prohibited. There shall be no solicitation or canvassing for commercial purposes of the public on the beach other than as permitted in this article.

Permitted beach vendors, who hold valid beach permits may solicit or <u>canvass for</u> the sale or rental of any merchandise, services, goods or property of any kind or character from <u>within ten feet of their</u> permitted operational area."

The City of Marco Island Land Development Code (LDC) also does not allow temporary structures such as storage lockers/containers or kiosks, as identified above, on the beach. However, the LDC does allow permanent structures, which would need to be authorized through an amendment to the Site Development Plan for the condominium/hotel, in addition to obtaining a city building permit and a CCCL permit from the Florida DEP. Per the August 5, 2021 and May 9, 2022, letter from the City of Marco Island to all vendors and property owners along the beach, vendor permits will not be issued until the site comes into compliance.

Aside from temporary structures, starting May 18, 2022, the City will commence with enforcement measures for any operations not meeting the expectations or requirements set forth in the applicable ordinance.

If you have any questions on this matter, please contact Amber Stonik, to discuss at (239) 3949 or astonik@cityofmarcoisland.com.

Thank you for your cooperation.

Amber Stonik, Planner II/ Environmental Planner
