RE: Measurements for M/V Lady Grace

1978 Grand Banks 42 Classic

GNDD05750778

DO: 599975

Mr. Timmerman, per our conversation and as you requested the undersigned surveyor did travel to and physically measure the subject vessel for true Hull Length and Length-over-all. Water line length was not requested nor measured.

**Hull length is described as the vessel proper total length as a single molded, welded or otherwise formed piece. No modular appendages such as bow pulpits, dolphins or swimming platforms are considered.*

**Length-over-all (LOA) is simply that. The entire and total length of the vessel with all her appendages considered.*

The subject vessel physically measured as follows:

Hull Length: 41'-11.75"

Length Over All: 45' 3"

Documentation length registered as 41.8'

This report is issued without prejudice this day in Marco Island

John Campbell
