

Prevention

1. Fertilization control (enforcement/education)
2. uptake by vegetation (already being done)
3. AWT (\$20-30M)
4. Street sweeping (already being done)
5. Nutrient capture
 - a. Exfiltration swales (denitrification) (in-progress)
 - b. Inlet side slot filling (in-progress)
6. Illicit discharges (grass clippings, palm fronds, etc.) (enforcement/education)
7. Sod reduction (council action – ordinance/incentives)

Remediation

1. Dredging (\$30M)
2. Septic to sewer
3. Circulation/flushing
4. Canal bottom elevation corrections
5. Aeration (oxygen entrainment)
