LETTER OF SOLE SOURCE CERTIFICATION

This letter serves as formal certification that eNoise Control (hereinafter referred to as "eNoise Control") is the **exclusive source and sole authorized provider** of the **UNC-XT-1 Outdoor Sound Curtain system**.

eNoise Control maintains full proprietary control over the design, engineering, materials, and supply chain associated with the UNC-XT-1 system. While certain manufacturing processes may be performed by qualified partner facilities, eNoise Control retains exclusive authority and control over all aspects of product specification, fabrication, and delivery, as outlined below:

- **Proprietary Materials and Construction**
The UNC-XT-1 system utilizes specialized composite construction, including reinforced mass-loaded vinyl barriers, fiberglass acoustic absorbers, and vinyl-coated protective facings. All materials are specified, qualified, and controlled exclusively by eNoise Control. No third party is authorized to substitute or independently procure equivalent materials for replication.
- **Exclusive Manufacturing Control**
All UNC-XT-1 products are fabricated under strict "build-to-print" specifications and quality standards established by eNoise Control. Manufacturing partners operate solely under contract and are not authorized to produce, distribute, or sell these systems independently.
- **Quality Assurance Ownership**
eNoise Control defines and enforces all quality control procedures, acoustic performance standards, and inspection requirements for the UNC-XT-1 system. Each product is delivered in accordance with these proprietary standards.
- **Design and Intellectual Property**
eNoise Control retains all intellectual property rights associated with the UNC-XT-1 system, including its composite acoustic design, material integration, and attachment methods. Due to the proprietary nature of this system, no equal or directly comparable product exists that matches its combined sound barrier and absorptive performance characteristics.

eNoise Control stands fully behind the performance, durability, and authenticity of the UNC-XT-1 Outdoor Sound Curtain system. Through exclusive control of materials, design, and manufacturing processes, eNoise Control is the **only qualified entity capable of supplying this system as specified**.

Sincerely,
Daniel Heston
