Alright, it is June 19th, at approximately 12:03 pm. We are at the Goodland Pump station. Its 2559 San Marco road. This was the neighborhood information meeting. We have Mary Holden from the City, Ben, Lis, and Liz from Collier County. There were no homeowners present but this was for the variance petition for the setback requirement for the existing structures of the tank and the building as well as the proposed structures of the new on-site generator that will be elevated.
