

Beautification Advisory Committee
Marco In Bloom 2026

This year, I am recommending that we invite nominations in the following six categories:

Residential Landscape Beautification Award – Two Sub Categories:

Personally Designed

Professionally Designed

These awards will recognize homes that demonstrate exceptional pride of ownership through well-maintained, outstanding landscaping. This includes an attractive landscaping design for the front yard, a clean, well-maintained exterior, and striking curb appeal.

Residential Sustainable Landscaping Beautification Award

This award will recognize homes that demonstrate exceptional pride of ownership through well-maintained, outstanding Florida-friendly landscaping. The landscaping will incorporate water conservation practices. This includes an attractive landscaping design for the front yard, featuring drought-tolerant or native plants, limited turf use, and a water-efficient irrigation system.

Cul-De-Sac Beautification Award

This award will recognize cul-de-sacs that contribute to the overall beautification of the neighborhood by demonstrating exceptional pride in the shared space. This includes an attractive landscape design that is well-maintained, provides vehicle safety, and incorporates drought-tolerant or native plants.

Condominium Beautification Award

This award will recognize condominium properties that contribute to the overall beautification of the community by demonstrating exceptional pride of ownership through outstanding property maintenance. This includes an appealing façade, a clean, well-maintained exterior, and an attractive landscaping design that incorporates sustainability and shields the parking lot(s) from the street.

Commercial/Public Building Beautification Award

This award will recognize a business or public building that contributes to the overall beautification of the community by demonstrating exceptional pride of ownership through outstanding property maintenance. This includes an appealing façade, a clean, well-maintained exterior, and an attractive landscaping design that incorporates sustainability and shields the parking lot(s) from the street.
