For variance requests for *existing structure(s)*, please provide the following information:

1. What is the requested encroachment?

Rebuilding a cage around pool on original footings which sits at 12'0"

2. When property owner purchased property?

Feb 25, 2025

3. When was the existing structure built (include building permit number if possible)?

92-14612

4. How was existing encroachment created?

Original Cage around pool with foundation wall is set at 12'

5. What is the certified cost estimate for bringing the existing structure(s) into compliance?

N/A

6. What extenuating circumstances exist related to the existing structures encroachment?

Existing pool footprint sits on the edge of the new 15' setback ordinance.

7. Are there any life/safety concerns related to the existing structure(s)?

N/A

For variance requests for *proposed structure(s)*, please provide the following information:

1. What is the proposed encroachment?

Rebuild Cage on existing footprint, at 12'0" from rear property line, which was allowed under the ordinance at the time it was originally installed, which includes the necessary footings which still exist.

2. Why is the encroachment necessary?

The existing pool and cage were built under a different setback. The new setback at 10' puts the edge of the cage at existing pool's water's edge.

3. What extenuating circumstances exist related to the proposed structure encroachment?

In order to provide for safety and general welfare of our special needs daughter, we want to rebuild the cage with the 2020 screen protecting her from bugs/no see ums. With the new setback of 15', it creates a safety issue putting the edge of the cage on water's edge, with no walkway, making that side of the pool a safety hazard.

NATURE OF PETITION

Please note that staff and the Marco Island Planning Board shall be guided in their recommendation to City Council acting as the Board of Zoning Appeals, and that City Council shall be guided in its determination to approve or deny a variance petition by the below listed criteria. Please provide a *narrative* response to the listed criteria and/or questions. Attach additional pages if necessary.

1. Are there special conditions and circumstances existing which are peculiar to the location, size and characteristics of the land, structure or building involved?

Yes, the new set back of 15' vs location of existing pool installed in 1982 leaves the edge of the pool close to the set back, making a cage to follow a peculiar footprint.

2. Are there special conditions and circumstances which do not result from the action of the applicant such as pre-existing conditions relative to the property which is the subject of the variance request?

Pre-existing location of pool and prior 15' setback allowed for a walkway around the entire pool, whereas the new 10' set back does not.

3. Will a literal interpretation of the provisions of this zoning code work unnecessary and undue hardship or create practical difficulties on the applicant?

Yes whereas the hardship of following these provisions causes a roadblock in egress path needed around the pool.

4. Will the variance, if granted, be the minimum variance that will make possible the reasonable use of the land, building or structure and which promote standards of health, safety or welfare?

Yes, we are simply asking to encroach the minimum distance to meet code with a 4' walkway around the pool.

5. Will granting the variance requested confer on the petitioner any special privilege that is denied by these zoning regulations to other lands, buildings, or structures in the same zoning district?

N/A

6. Will granting the variance be in harmony with the intent and purpose of this zoning code, and not be injurious to the neighborhood, or otherwise detrimental to the public welfare?

Yes, this will not have any impact on neighborhood or public welfare otherwise.

7. Are there natural conditions or physically induced conditions that ameliorate the goals and objectives of the regulation such as natural preserves, lakes, golf course, etc?

N/A

8. Will granting the variance be consistent with the growth management plan?

Yes
